

Updating the Delete Link (View) in Visual Studio

1. From **Views > Item** folder, open **Index.cshtml**.
2. From **Index.cshtml**, remove line 65:

```
63 | <td>
64 |     <a asp-action="Edit" asp-route-id="@item.ItemId">Edit</a> |
65 |     <a asp-action="Details" asp-route-id="@item.ItemId">Details</a> |
66 |     <a asp-action="Delete" asp-route-id="@item.ItemId">Delete</a>
67 | </td>
```

3. Include an **onclick** attribute to the delete link and set a **confirm** JavaScript method as the attribute value.

```
<td>
    <a asp-action="Edit" asp-route-id="@item.ItemId">Edit</a> |
    <a asp-action="Delete" asp-route-id="@item.ItemId"
      onclick='return confirm("Are you sure?");'>Delete</a>
</td>
```

4. When you rerun the Index page, the browser will prompt a message first before deletion.
